

ELORA TECH INSTITUTE

Course Catalogue 2026

Technology education for the skills of tomorrow.

Welcome to ETI

EloraTech Institute is part of a broader technology ecosystem bringing together education, software, innovation, research, and entrepreneurship to help shape the future of Africa. Our courses are built around practical skills, real projects, and continuous growth for learners ready to move forward.

Explore Your Learning Path

Six disciplines. One direction: forward. Choose the track that fits where you are — and where you want to go.

Web Development

Web Development

Web Development with AI

Software Engineering

Mobile Development

Data & Analytics

Data Science

Programming

Python for Beginners

Python for Maintenance Engineering

AI & Emerging Tech

Building AI Agents for Beginners

Prompt Engineering

UI/UX Design

UI/UX Design

Web Development

Two courses. One discipline. From production-ready full-stack engineering to AI-accelerated modern development — choose the path that matches your goals.

FULL-STACK

Web Development

Build production-ready web applications using React, Next.js, APIs, databases, deployment, and SEO. A comprehensive programme for learners who want to master the full stack from front to back.

Duration: 10 weeks

Format: Hybrid

Core Skills

REACT

NEXT.JS

NODE.JS

POSTGRES SQL

TYPESCRIPT

CLOUD

AI-POWERED DEVELOPMENT

Web Development with AI

Learn modern web development enhanced with artificial intelligence. Build websites and applications faster using AI-assisted workflows, modern frameworks, APIs, and automation tools. **This is ETI's current flagship cohort.**

Duration: 7 weeks

Format: Online

Core Skills

HTML

CSS

JAVASCRIPT

REACT

NEXT.JS

AI TOOLS

Current flagship cohort — September 2026. See page 8 for registration details.

Mobile Development + Data Science

Two of the most in-demand disciplines in modern technology—building the apps people use and extracting the insights that drive decisions.

NATIVE & CROSS-PLATFORM

Mobile Development

Build native and cross-platform mobile applications for iOS and Android using Swift, Kotlin, and React Native. Learn the full mobile lifecycle — from design and development to testing and deployment.

 **Duration:** 14 weeks

 **Format:** Hybrid

Core Skills

SWIFT

KOTLIN

REACT NATIVE

FIREBASE

ANALYTICS & AI

Data Science

Learn to extract insights from data using Python, Pandas, machine learning, and data visualization. Build predictive models and data-driven solutions that address real-world challenges.

 **Duration:** 16 weeks

 **Format:** Hybrid

Core Skills

PYTHON

PANDAS

SCIKIT-LEARN

TENSORFLOW

TABLEAU

Programming

One language. Different starting points.

Python is one of the most versatile and widely used programming languages in the world. Whether you are writing your very first line of code or applying programming to a professional engineering context, ETI has a Python track designed for your starting point.

BEGINNER FRIENDLY

Python for Beginners

Start your programming journey with Python. Learn programming fundamentals, problem-solving, automation, and how to build your first applications. No prior experience required — just curiosity and commitment.

 **Duration:** 8 weeks

 **Format:** Hybrid

Core Skills

PYTHON

PROGRAMMING LOGIC

AUTOMATION

PROBLEM SOLVING

ENGINEERING TRACK

Python for Maintenance Engineering

Apply Python programming to engineering workflows. Learn data analysis, automation, equipment monitoring concepts, and tools that improve maintenance processes. Designed for professionals in technical and industrial environments.

 **Duration:** 10 weeks

 **Format:** Hybrid

Core Skills

PYTHON

ENGINEERING AUTOMATION

DATA ANALYSIS

INDUSTRIAL APPLICATIONS

AI Engineering + Product Design

Two complementary disciplines that define how modern digital products are built: intelligent systems that reason and act, and human-centred design that makes them worth using.

AI ENGINEERING

Building AI Agents for Beginners

Understand how AI agents work and learn to build simple intelligent systems that can reason, use tools, automate tasks, and solve real-world problems. A practical introduction to one of the most important emerging areas in technology.

 **Duration:** 10 weeks

 **Format:** Hybrid

Core Skills

AI AGENTS

LLMS

PYTHON

AUTOMATION

APIS

PRODUCT DESIGN

UI/UX Design

Master the craft of product design — from user research and wireframing to high-fidelity prototypes and design systems. Create digital products that people love to use. This course is independent of the AI Engineering track and focuses entirely on human-centred design practice.

 **Duration:** 10 weeks

 **Format:** Hybrid

Core Skills

FIGMA

USER RESEARCH

PROTOTYPING

DESIGN SYSTEMS

Prompt Engineering

AI PRODUCTIVITY

Master the skill of communicating with AI effectively. Learn prompt design, AI workflows, automation strategies, and how professionals use AI tools to improve productivity. One of the most immediately applicable skills in the modern workplace.

 **Duration:** 6 weeks

 **Format:** Hybrid

 This course includes a practical bonus toolkit — see below.

Core Skills

PROMPT

CHATGPT

AI WORKFLOWS

DESIGN

AUTOMATION

 INCLUDED BONUS

AI Career Application Toolkit

Included as part of the Prompt Engineering learning experience, this toolkit gives learners a concrete, practical edge when applying for roles. These tools help you create stronger, more targeted applications — they do not promise that an ATS will accept your application or that a job will be obtained.

AI-Assisted CV Tailoring

Use AI agents to analyse a specific job description and tailor your CV to the role — keeping your experience truthful and relevant.

ATS-Aware Optimisation

Identify relevant keywords, improve role-specific phrasing, and structure application content for applicant-tracking systems — without keyword stuffing or fabricating experience.

Cover Letter Personalisation

Use AI workflows to create a targeted cover letter aligned with a specific role, company, and your own background.

Job Application Workflow

Turn a job description into a practical checklist: required skills, evidence to highlight, gaps to address, and application-ready content.

Interview Preparation

Use AI to generate role-specific practice questions, critique your answers, and rehearse concise, confident responses.

Reusable Prompt Library

A practical library of prompts and workflows you can adapt for future applications and professional tasks — yours to keep and build on.

CURRENT OPPORTUNITY

September 2026 Cohort

September 8, 2026

AI-POWERED DEVELOPMENT

Web Development with AI

Learn modern web development enhanced with artificial intelligence. Build websites and applications faster using AI-assisted workflows, modern frameworks, APIs, and automation tools. This is ETI's current open cohort — places are limited.

Cohort Details

 **Duration:** 7 weeks

 **Format:** Online

Why Learn With ETI

ETI is built on a simple belief: the best way to learn technology is to use it. Every course is designed around real projects, practical skills, and continuous feedback — not passive lectures or theoretical exercises.

Practical, Career-Focused Education

We believe in learning by doing. Every course is built around real projects and industry-relevant skills that you can apply immediately.

Real Projects

Build applications that solve real problems — not just exercises. Your portfolio grows as you learn.

Mentorship

Learn with guidance, feedback, and support throughout your learning journey. You are not alone in the process.

Certification

Eligible learners can receive an ETI certificate upon meeting the requirements of their course or program.

AI-Assisted Workflows

Learn to use modern AI tools to accelerate your development and work more effectively as a technology professional.

How We Teach

Our approach is hands-on and iterative. You will build from day one. The ETI learning model moves through four stages — each one building on the last.

Earn Your ETI Certificate

ETI provides certificates for eligible learners who meet the requirements of their course or program. Certificate verification is being introduced as part of the ETI platform. Details about eligibility, issuance, and verification will be published as the system becomes available.

Your next skill could change what comes next.

Explore ETI courses and find the one that fits where you are going.
